

# CS3.6

- Sixth generation advancement of THIEL's Coherent Source® design
- 3" thick front baffle, 1" thick cabinet walls, and extensive internal bracing reduce unwanted vibration for improved clarity and imaging performance.
- Baffle's rounded edges contribute to very open sound by significantly reducing cabinet edge diffraction
- Completely time and phase coherent for greater realism

The legendary CS3.6's is a sixth generation advancement of THIEL's Coherent Source design pioneered in 1978 with the classic THIEL model 03. The CS3.6's three-way design uses numerous advanced techniques in driver, cabinet, and crossover design to provide its high level of performance. A double cone diaphragm midrange driver, a 10-inch aluminum diaphragm woofer and a 1-inch metal dome tweeter are combined with premium components and superb attention to construction detail to provide excellent clarity, superior imaging, life-like dynamics, and extremely accurate tonal response. We believe the CS3.6 offers the discerning music lover an exceptionally complete and satisfying musical experience.

*"I can say without reservation that the THIEL CS3.6 is a remarkable loudspeaker."*

—Robert Harley  
*Stereophile*, May '93

*"...this is one of the finest sounding loudspeakers I have heard at any price, and one that advances the state-of-the art in the only area that counts: reproducing music."*

—Anthony Coresman  
*The Absolute Sound*, March/April '93

## THIEL's Award-winning sound

- Innovations Design & Engineering Award for 1993

- *Stereophile Magazine's* 1993 "Loudspeaker of the Year"

- *Audio/Video International's* Grand Prix "Product of the Year" for 1993 & 1995

*"This speaker is as smooth as a shot of Jim Beam Black Label and as easy to enjoy... Given the right system, they'll give you chills."*

—Ken Kessler,  
*Hi-Fi News & Record Review*, November '92

The  
difference  
is our  
engineering

*"There are few \$10,000 speakers that come close to the THIEL [CS3.6]."*

—Andrew Marshall,  
*Audio Ideas Guide*, Winter 1994
