

PowerPoint®

The THIEL surface-mount PowerPoint helps you create the optimum sound environment regardless of placement

THE POWERPOINT® IS A HIGH PERFORMANCE surface-mount speaker designed to help the listener create the optimum sound environment in their room. The PowerPoint can be placed on walls or ceilings, and used as front, center, or rear speakers for very realistic sound reproduction in home video and music sound systems. The PowerPoint's combination of coaxial/coplanar drivers and wedge shaped enclosure allow the user greater control over the sound coverage in their room, enabling them to create the sound environment of their choice.

Usability without compromising performance

The PowerPoint brings a new level of performance to a category that usually compromises sonic performance for usability. The PowerPoint uses the same high performance drivers we design and build for our award-winning line of floor-standing and bookshelf loudspeakers. The two-way PowerPoint's coaxial/coplanar 6.5 inch woofer and 1-inch dome tweeter use THIEL's innovative short coil/long gap motor system for extremely low distortion and both

“...the single most extraordinary—the best—home theater product I have encountered...a breakthrough in sonic performance.”

—Tom Miller,
The Perfect Vision, Issue 33,
November/December 2000

I'm Paintable!

Perfectly match your home's decor with a **painted** PowerPoint. Available in a variety of colors or do-it-yourself.

use aluminum diaphragms for outstanding tonal response. The tweeter is the same unit as used in THIEL's flagship model CS7.2. As with all THIEL loudspeakers, the PowerPoint utilizes a synthesized first-order crossover system to eliminate phase distortion.

The Innovative THIEL PowerPoint: *How It Works*

Conventional In-ceiling Speakers

The coverage area of conventional ceiling speakers leaves some listeners outside the listening area, degrading performance.

Ceiling Mounted PowerPoints

PowerPoint's unique wedge shape directs the sound to cover a very wide area, maximizing performance throughout the room for a variety of listening positions.

“ *Thiel has created the first on-wall speaker that produces real stereo sound, with all the depth, imaging, and soundstaging that stereo can produce...Real high-end sound from an on-wall speaker.* ”

—Brent Butterworth, *Home Theater*, May 2000
