

CS1.6

- High performance sound from a small, floor-standing loudspeaker
- High 90dB efficiency to improve output capability with lower power amplifiers
- Completely time and phase coherent for greater realism
- Specially designed, ultra-low distortion woofer and tweeter
- Magnetically shielded for placement near video displays
- Provides great realism for both music and movies

The look is sleek and unassuming. The sound is totally exhilarating. The CS1.6 establishes a new benchmark in loudspeaker performance that substantially reduces the entry price into high-end sound. The CS1.6's two-way design incorporates several new innovative design techniques that greatly improve performance in a small, floor-standing loudspeaker. The 36-inch tall CS1.6 delivers a much purer and more open upper midrange response coupled with a sweeter and smoother high frequency performance than conventional two-way models. The new CS1.6 also offers a high 90 dB efficiency to work well with lower amounts of amplifier power.

*"Attractive,
Affordable,
Awesome...
an instant classic."*

—Tom Müller
The Absolute Sound, April/May '02

"...the CS1.6 is one of the very best speakers I've heard...they must be considered a relative bargain at their asking price."

—Tim Shea,
SoundStage.com, July '02

THIEL's Award-winning sound

-  Innovations Design & Engineering Award for 2003
-  The Absolute Sound's "Editors' Choice" Award & "Best Buy"
-  SoundStage "Exceptional Value" Award 2002
-  The Absolute Sound's Mid-priced "Speaker of the Year" Award

"The CS1.6 struck a balance that was not only remarkable for a speaker at its price, it was remarkable for a speaker at any price."

—Fred Manteghian,
Stereophile Guide to Home Theater, November '02

"...it's difficult for me to conceive of a better balanced, more musically satisfying presentation than that delivered by the CS1.6...Giant killers."

—Dan Pond,
The Audiophile Voice, Vol. 8, No. 3

The difference is our engineering

The CS1.6's Innovative Woofer/Voice Coil Design

Achieving excellent upper midrange performance presents one of the greatest challenges in a two-way speaker configuration. One of the most innovative solutions is the design of the CS1.6's woofer diaphragm and voice coil.
