

ViewPoint®

- High performance sound for wall-mounted video displays.
- Custom-built, paintable cabinet to visually integrate with any brand of display
- Completely time and phase coherent for greater realism
- Ultra-low distortion short-coil, long gap, copper-stabilized driver motor systems
- All-aluminum enclosure reduces unwanted vibration for outstanding clarity and spatial performance
- Coaxial/coplanar driver mounting and 90 degree radiation pattern enables the sound to cover the room far more completely

The THIEL ViewPoint® is the perfect solution for adding high performance sound to your wall-mounted video display. The ViewPoints are built-to-order—the all-aluminum cabinet is trimmed in length and painted to match your TV— to visually integrate with *any* brand of flat-panel, wall-mounted video display for a unified, original equipment appearance. Designed using the same innovative technology found in THIEL's full-line of award-winning loudspeakers, the 2-way ViewPoint delivers no-compromise sound without all the clutter of multiple speaker boxes.

Movie soundtracks and music videos alike reveal new subtlety and emotion.

Home Entertainment & Design,
April 2004

"...stunningly beautiful sound...Now it's possible to have both superb aesthetics and superb sound in a room where a full surround system isn't an option...highly recommended."

—Randy Tomlinson,
The Perfect Vision

THIEL's Award-winning sound

• *The Perfect Vision's* "Editors' Choice" Award for 2004

• *Tech Living Magazine* "Must Have" Product for 2004

• *Secrets of Home Theater & HiFi* "Best On-Wall" for 2004"

"I am inspired to abandon my career, buy some ViewPoints and a plasma TV, retire to the sticks, and watch DVDs all day."

—Brent Butterworth
Home Entertainment & Design, April 2004

Best of Innovations
Design &
Engineering Award

Named the best high performance audio product for 2005 by the International Consumer Electronics Show

"The look is elegant, but how did this unorthodox arrangement sound? Sparklingly clear and exceptionally spacious, as it turned out."

—*Sound and Vision Magazine*,
September 2004
